INTRODUCTION/BACKGROUND

Despite longstanding commitments and efforts by leaders from across sectors including substance use disorder (SUD) treatment providers within San Diego County, high-risk behaviors and harms related to substance use remain at an all-time high.

Overdose deaths in the region jumped from 616 in 2019 to 941 deaths in 2020, including a three-fold increase in fentanyl deaths. Sadly, a higher monthly trend continues in the early part of 2021, on pace for nearly 1,200 overdose deaths for the year if the current trend continues. Overdose deaths are only one indicator of the impact of substance use in our region, as the harms of substance use extend to families, neighborhoods, the healthcare system, and to other intersecting systems.

To make a significant impact on this trend, a broader approach focusing specifically on reducing harms and high-risk behaviors can be integrated across health and social services—one that is cohesive and on a continuum with existing SUD services. Over thirty years of evidence around the world has shown that harm reduction approaches reduce the spread of the Hepatitis C virus (HCV) and the human immunodeficiency virus (HIV), lead to greater engagement with treatment, lead to reductions in crime, and reduce overdose deaths, among other positive outcomes, with no increase in usage rate of substances.

A Comprehensive Harm Reduction Strategy is being put forth in this document, pursuant to Board of Supervisors’ direction on January 26, 2021 (13). The Harm Reduction Strategy will guide the County of San Diego, in collaboration with partners and stakeholders, in addressing the most pressing issues at the intersection of behavioral and public health; and will initiate and effect data-driven decision-making and evidence-based solutions to improve outcomes for both the people who use drugs (PWUD) population—a high-need population—and the broader San Diego community.

VISION

Envisioning a community where the impacts related to substance use are seen as a crisis that influences overall health, well-being, and the quality of life of the individual, families, and community, where stigma does not impede access to services, and where we realize a community free of substance use-related harms.

MISSION

To protect San Diegans from the individual, family, and community impact of drug use by enacting a harm reduction approach towards substance use which prioritizes human dignity, saving lives, providing appropriate levels of care for people who use drugs (PWUD), and best practices in addressing substance use, and addiction.

GUIDING PRINCIPLES

Guiding principles of the harm reduction approach in San Diego County are as follows:
Human Rights and Dignity
Substance Use and Harm Reduction approaches in San Diego County respect all human beings, meeting them “where they’re at” without judgment and aim to reduce the stigma of people who use drugs (PWUD).

Diversity and Social Inclusivity
The County of San Diego strives to respect all PWUD, as well as their families and communities, regardless of gender, race, age, sexual orientation, ethnicity, culture, spirituality, health, or socioeconomic status.

Health and Well-Being Promotion
The County of San Diego aligns with the Live Well San Diego vision of healthy, safe, and thriving communities. Harm reduction efforts are oriented toward improving the health, safety, and capacity to thrive for all PWUD.

Partnerships & Collaborations
Harm reduction approaches are informed by and carried out through partnerships and collaborations across all sectors in the community. Partnerships are built upon the foundation of shared goals and trust in the interest of serving our community.

Participation (“Nothing about us without us”)
The County of San Diego recognizes the right of PWUD to be involved in the efforts to reduce the debilitating impact of drug use in their communities.

Accountability and Improvement
The County of San Diego is committed to continuous improvement in the quality of its harm reduction efforts and intends to use data, community feedback, and input to continually assess current and future individual and community needs.

STRATEGIC APPROACH AND PRIORITIES
Leveraging the expertise of individuals with lived experiences, behavioral health professionals, public health professionals, primary care providers, first responders, clinical experts, housing experts, and other subject matter experts and stakeholders, the Harm Reduction Strategy will inform collaborative efforts, evidence-based programming, and data-informed approaches to realize a physical health and behavioral health landscape which addresses the unique needs of specific populations in San Diego County. The strategy will guide decision-making for population health interventions initiated, designed, and implemented by the County of San Diego.

• Prioritize parity, healthcare integration, and a harm reduction in all policies and programs approach across all key areas of work.
• Use an approach that employs equity in the governance of mental health, substance use, and physical health services.
• Utilize a data-driven approach and best practices of harm reduction.
• Work with existing initiatives—such as Getting to Zero, Hep C Elimination Initiative in San Diego County, TB Elimination Initiative, and others—as touchpoints to further the goals of eliminating disease and reducing impact to the focus population.
The foundation of a successful substance use and harm reduction ecosystem in San Diego County will be worked on and operationalized within four tactical areas. These tactical focus areas are as follows:

I. Cross-Sectoral Convening
   The mission of greater health equity and improved health outcomes for the PWUD population in San Diego County requires integrated, cross-sector approaches. Convening and collaboration between County of San Diego business units, as well as health networks, community-based organizations, physical health entities, family and community voices, and other stakeholders is necessary to address the multifactorial challenges facing the PWUD population.

II. Housing
   Substance use and homelessness often overlap, with homelessness exacerbating the harmful effects of drug use, and vice versa. Being on the street and pushed to the margins increases the likelihood of risky behaviors and decreases the effectiveness of interventions aimed at reducing the harmful impact of substance use. Housing, therefore, must be a key pillar of a comprehensive harm reduction strategy.

III. Workforce
   To carry out the mission and realize the vision of the Harm Reduction Strategy, a workforce that is trained and skilled in the philosophy, approaches, and interventions of harm reduction will be a necessity. Developing and supporting a workforce that employs harm reduction principles across levels and types of service will be prioritized in our strategy.

IV. Healthcare Integration and Access
   The health and well-being of individuals do not exist in silos. Integration of care and access to the right services for PWUD is paramount. The effects of substance use impact the mental health and physical health of an individual, and the physical health and mental health of an individual impact the course and outcomes of their substance use. Integration across mental health, SUD, physical health, and community-based services is a key component of addressing the well-being of PWUD and managing care of individuals in a lower-acuity, chronic care context rather than expensive episodic, acute care contexts. For the chronic condition of SUD, harm reduction services and principles help add the necessary bridge for many clients for whom recovery is non-linear. When SUD treatment providers work in conjunction with harm reduction services and with harm reduction principles, service continuity can be optimized. Treating the whole person and ensuring access to best practices in harm reduction guide this focus area.
## TACTICAL FOCUS AREAS

<table>

<tbody>
<tr>
<td><strong>Immediate-term Tactics</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Include public health leadership from government and community in governance of key regional meetings</td>
<td>• Collaborate with housing technical expert(s) for review and comparison of needs and/or investments, including recommendations for leveraging national best practices and funding strategies that integrate harm reduction principles in housing settings</td>
<td>• Ensure that harm reduction is a core component of peer service delivery</td>
<td>• Issue Local Standing Order and implement broad local Naloxone distribution sprint to address COVID-19-related patterns of substance use</td>
</tr>
<tr>
<td>• Deploy County epidemiologists to provide technical assistance to key regional convenings to support development of a harm reduction approach, (i.e., development of data reports and dashboards)</td>
<td>• Develop joint annual harm reduction strategy-setting between key regional convenings</td>
<td>• Leverage new data reports and dashboards to inform upstream prevention efforts as part of cross-sectoral convenings</td>
<td>• Optimize Drug Medi-Cal Organized Delivery System provider network naloxone distribution</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Intermediate-term Tactics</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Implement joint annual harm reduction strategy-setting between key regional convenings</td>
<td>• Implement strategies identified via the above review to integrate harm reduction principles in housing settings, including strategies to address people with substance use disorder who are not considered disabled</td>
<td>• Enhance County and contracted workforce training to include harm reduction principles and strategies</td>
<td>• Identify solutions to address parity in the provision/siting of substance use disorder versus mental health services</td>
</tr>
<tr>
<td>• Leverage new data reports and dashboards to inform upstream prevention efforts as part of cross-sectoral convenings</td>
<td>• Develop revised metrics and associated targets related to housing that incorporates a harm reduction approach</td>
<td>• Identify policy opportunities to integrate FQHC and substance use disorder care delivery, including enhanced integration/coordination around Drug Medi-Cal Organized Delivery System (DMC-ODS), and collaboration around CalAIM</td>
<td>• Engage health plans, including Medi-Cal plans, to incorporate harm reduction opportunities in policy and practice</td>
